SCOPE OF WORK AND SERVICES REQUIRED
WHEAT RIDGE · WARD STATION AREA PROJECTS
ENGINEERING CONSULTING SERVICES

I. INTRODUCTION

A. General

The City of Wheat Ridge (the “City”) is located in the northwest area of the Denver metropolitan area just west of downtown Denver. The City’s area consists of about nine square miles adjacent to the Interstate 70 transportation corridor between Denver and the Rocky Mountains. The topography is somewhat unique, with a natural ridge traversing the City. The City is a suburban community of approximately 31,000 residents. Our governing body consists of eight Council members, Mayor, and City Manager.

B. Background

The opening of RTD’s G Line Commuter Rail offers the City significant re-development opportunities, particularly in the area surrounding the Wheat Ridge · Ward Station, located on Ridge Road, between Ward Road and Tabor Street. The rail line is anticipated to open for service in the fall of 2018. With any significant redevelopment opportunities on properties surrounding the station, significant public and private infrastructure improvements will be needed.

In November of 2016, Wheat Ridge voters approved a 12-year, ½ cent increase in the City’s sales and use tax rate in order to fund investments that will improve transportation infrastructure, create opportunities for economic development, and enable additional “place-making” to attract those wanting to live, work, and do business in Wheat Ridge.

A citizen-led task force identified the four projects that will be funded from the proceeds of the tax increase with one of those projects being improvements to public infrastructure and amenities in support of economic development at the Wheat Ridge · Ward Station area.

The City recently completed a visioning process with a consultant to plan and strategize for future redevelopment and improvements. A copy of the most recent version of the vision document can be accessed at the Investing 4 the Future webpage at the following link: <http://www.ci.wheatridge.co.us/1560/Investing-4-The-Future--Projects-Funded->

In order to encourage private redevelopment, the following potential public improvements have been identified at this time:

1. Improvements to 52nd Avenue (between Ward Road and the City boundary east of Simms Place) to collector street standards.
2. Improvements to Tabor Street (between 52nd Avenue and Ridge Road) to local street standards.
3. Improvements to Ridge Road (between Ward Road and the Station) to collector street standards.
4. Improvements to Ridge Road (between Tabor Street and the City boundary east of Simms Place) to collector street standards.
5. New traffic signals or improvements to existing traffic signals.
6. Pedestrian bridge over the rail lines from the Station south to 49th Place.
7. Additional multi-modal (transit, bicycle, and pedestrian) facilities throughout the area serving the Station.
8. Drainage infrastructure, including stormwater conveyance, detention, and water quality improvements, preferably on a regional level.

C. Objectives

The purpose of this RFQ is to contract with one qualified firm experienced in designing streets, pedestrian bridges, drainage, and multi-modal infrastructure to provide engineering services to prepare construction documents. The firm needs to have expertise in transportation, urban design, and landscape architecture. The City anticipates

making an award of a performance based contract in late July 2018. Individual task orders will then be issued for each of the improvement projects. The first task order will likely be issued soon after the contract has been approved.

The City retains the option to continue working with the awarded firm for additional task orders, negotiating scopes and fees for each task order, yet based on labor rates negotiated with this initial RFQ process to maintain continuity of the project.

II. STATEMENT OF WORK

It is unknown at this time if the above potential projects will be constructed as stand-alone projects, in conjunction with adjacent redevelopments, or at some later time outside of the scope of this RFQ. In either case, the following professional services are anticipated to be required:

- A. Topographic Survey** – Collect field topography, existing surface features, and existing underground infrastructure of the project area including streets, side street approaches, sidewalks, lighting, traffic control devices, trees, landscaping, other miscellaneous structures, and public and private utilities.
- B. Geotechnical Analysis** – Collect geotechnical information to determine the existing pavement depth and to provide recommendations on pavement design.
- C. Construction Documents**
 - 1. Construction plans – Prepare construction plans based on conceptual designs previously prepared for the City. The construction plans will include the following elements:
 - a. Alignment – The alignment of the streets is not expected to significantly change from the conceptual streets design.
 - b. Profiles and cross-sections – The profiles and cross-sections will be set based on the existing elevations along the limits of construction since changes in those elevations are not expected prior to the project.
 - c. Storm sewer system – A proposed storm sewer system will need to be proposed since very little local stormwater infrastructure exists. Regional storm sewer exists crossing the RTD right-of-way.
 - d. Utilities relocations – Coordinate utility relocations based on information provided by utility companies and marked in the field and any impacts of the street reconstruction. Includes coordinating relocations with utility companies.
 - e. Signing and striping – Prepare signing and striping plans.
 - f. Streetscape elements – Prepare streetscape plans based on the guidance provided in the City's Streetscape Design Manual and City details and standards.
 - g. Stormwater pollution management plan – A project specific SWMP will need to be developed.
 - h. Traffic control plans – Traffic control and construction phasing plans will need to be developed to maintain access to properties, both business and residential, throughout construction.
 - 2. Technical specifications – Prepare technical specifications based on the City's project special provisions that modify the CDOT Standard Specifications.
 - 3. Estimated Quantities – Obtain quantities and unit costs for the various project elements to assist City staff in preparation of cost estimates.
- D. Document Submittal** – This includes the preparation, submittal, and response to comments of the following review sets:
 - 1. 60% review sets to the City for preliminary review and approval.
 - 2. 90% review sets to the City for final review and approval.
 - 3. 100% review sets to the City to include in the bid package.
- E. Permit Assistance** – Assist City staff in preparing applications for all required permits.
- F. Bidding Assistance** – Limited bidding assistance will be required including the following:
 - 1. Production of the electronic and paper copies of the plans and specifications for bidding purposes. The City will maintain and provide a plan holders' list, prepare the advertisement for bids, submit to the required outlets, and distribute plans to prospective bidders.
 - 2. Respond to requests for information from bidders.
 - 3. Prepare documents for any addenda, if required. The City will distribute any addenda, if required.
- G. Public involvement** – Prepare documents and exhibits to support City staff in meeting with City Council and the public.
- H. Right-of-Way** – The City will be separately contracting with a right-of-way consultant to obtain any necessary right-of-way and easements.

- I. **Project Schedule** – Once the 60% review has been completed for each improvement, an aggressive schedule will be necessary to complete the plans and start construction. The City has a very unique provision in its Charter that requires City Council to designate the width of City streets. So whenever the width of street is changed the City Council must vote to designate the new street width. Construction must be started within one year of the designation.
- J. **Construction Administration** – Assist City staff with the following items:
 - 1. Attend preconstruction conference.
 - 2. Prepare documents for change orders and other written directives, including responses to requests for information. City staff will issue the change orders and other written directives.
 - 3. Approve shop drawings, material list reports, and all information on material to be used for construction in accordance with the plans and specifications.
- K. **Project Close-Out**
 - 1. Obtain record information from field representatives.
 - 2. Prepare record drawings.

The following general requirements will be necessary to provide the services required for these projects:

The consultant shall review the Construction Contractor's shop drawings for conformance with the contract documents and compliance with the provisions of the contract documents in connection with this work.

CDOT, in its sole discretion, may review construction plans, special provisions, and estimates and may require the City to make such changes therein as CDOT determines necessary to comply with CDOT and FHWA requirements.
